

A Professional Safety Consultant can be your trusted source for managing all of your safety needs.

An on-site Professional Safety Consultant can assist you with:

- Job task analysis, incident investigation and workplace inspections
- Conducting a thorough review of the existing safety documentation and help identify gaps within the legislative requirements
- Policy development
- Managing OHS Committee meetings
- Advising union and management of OHS issues
- Compliance audits
- Developing Standard Operating Procedures for high-risk jobs
- Developing customized training unique to your workplace

SSM's Professional Safety Consultant program also offers you:

- No recruitment cost or time
- No need to pay benefits such as sick time, holidays or EI
- Access to the expertise and resources of SSM

Preventing loss, protecting people since 1964
