

Want to learn industry best practices and relevant legislation around fall protection?

Safety Services Manitoba can help!

This course covers Federal and Provincial standards and relevant legislation, selection, fit and maintenance of fall protection equipment and differences between fall protection and fall restraint.

Our experienced and certified instructors will guide you through:

- Provincially legislated requirements
- Comprehensive Fall Protection Theory
- Equipment familiarization/system setup
- Identification of Hazards in the Fall Protection field
- Detailed development of Fall Protection plans
- Competent guidelines for inspecting fall protection equipment
- Practical component on in-house simulator

1 Day – Classroom and Practical Training

Please note: The course may run for 6-8 hours, depending on class size.

The employer, by law, shall provide a training program for each employee who might be exposed to fall hazards. This course is designed for Supervisors, Safety Officers, Managers and the employees who will work in an environment that place them at heights over 10 feet or at heights with unusual risk of injury (Please refer to the WCA sect. 3 and WSBC regulations, sect 11).

Preventing loss, protecting people since 1964
